

EXPEDITIONS ALASKA: PACKING INFORMATION

Getting your gear right can make or break a trip. Alaska's weather changes daily and often. There can be high temps with long days of sunshine followed by cold fronts with snow and rain. The Camp staff will train campers how to be comfortable in all weather. But, you must have the right gear. Please follow this list carefully. If you have any questions on packing please contact the Camp Director.

We suggest that campers purchase gear at Recreational Equipment Inc. (REI). The reason why is because there is an REI in Anchorage. If for any reason you need to exchange items or buy new ones we can make a stop on our first days in Anchorage.

Important Things to Consider:

- **Base Layer:** The base layer is meant to help regulate body temperature by wicking moisture away from the skin. Merino wool and synthetic fabrics are great for this. Try to avoid cotton as it will retain moisture and can leave you feeling cold and wet. This piece of clothing should be relatively snug as you will often wear other layers over it.
- **Insulation Layer:** This layer will help you retain heat by trapping it close to your body. Fleece or wool jackets are the best fabrics for this.
- **Shell Layer: This is your most important piece of equipment.** The shell layer, or top layer, is meant to protect you from wind, rain or snow. This layer should be big enough to fit over both the base and insulation layers that you will wear underneath. A shell should be wind resistant, waterproof and insulated.

Brand Recommendations:

- Patagonia, Columbia and North Face have a lot of options for clothing and bags. A Patagonia Nano Puff Jacket is a great lightweight option for an insulated jacket. All three brands make a variety of options for fleece jackets that vary in style and weight.
- Ozark Trail makes some fantastic hiking/camping equipment that is reasonably priced (look for mess kits, sleeping pads or sleeping bags)
- Columbia has a variety of thick soled, trail running shoes that are great for day hikes.
- Chacos or Tevas work well for camp shoes because they are waterproof and contain a back strap.
- Osprey makes a large variety of lightweight, day pack options.

Bags and Packs

- **Duffel Bag (60-90 liter):** travel with all of your gear in a duffel bag. This bag should be strong enough to withstand airline travel and big enough to hold all of your stuff. Be sure to check with your airline to determine size and weight restrictions.
- **Backpack (25-35 liter):** Camper will **NOT** have to carry all of their stuff on their backs. We will not be doing any long range over night backpacking trips in the back country. However, we will be doing long day hikes over glaciers and tundra. Campers will want to bring a medium size daypack to carry a lunch bag, change of clothes, rain gear, fresh socks, camera, two water bottles and other personal gear.

PACKING LIST

CLOTHING

<u>Item</u>	<u>Quantity</u>	<u>Description</u>
<input type="checkbox"/> Base Layer (long underwear top) shirt	2	Light weight, warm, synthetic or wool long sleeve
